

SCEBIZ4M MEETING ANNOUNCEMENT –THURSDAY, SEPTEMBER 24, 2009

Southern California e-Business Forum

Summer is almost over and it's time to begin thinking about getting back to "normal." That means it's time to have another spirited conversation about the state of e-business and issues relevant to your firm and your career.

The September luncheon discussion will focus on whatever you bring to the meeting . . . technology issues, e-business issues, career issues, blue-sky prognosticating (Hey here's one: What will it take for the U.S. to move up in the rankings of the greatest penetration of broadband service?)

This informal luncheon meeting format has become extremely popular and space is limited, so we usually attract a group size that is very conducive to open discussion. If you have attended one of these meetings in the past year, you know what we mean; but if you haven't come by in awhile, you're in for a terrific experience.

Here are the particulars:

DATE: Thursday, September 24, 2009

PLACE: Monterey Hill Restaurant

3700 Ramona Blvd.

Monterey Park, CA 91754

(323) 264-8426

(See Driving Directions below)

TIME: 11:30 AM - Registration

11:45 Noon - Luncheon Meeting begins

1:30 PM - Adjournment

LUNCHEON CHARGE: The luncheon charge is \$15.00, payable at the door. If you are paying your 2009 annual dues at this meeting, the luncheon charge is included.

R.S.V.P. – Please respond by September 21 so that we can alert the restaurant as to the number of places to set up for us. Simply press "REPLY" and in the body of the message type your name and "YES."

MEETING FORMAT:

This luncheon meeting will be an open discussion on multiple e-commerce topics raised by attendees. Bring your concerns, questions, and your soapbox, and be prepared to participate. Several topics have already been posed for this meeting, including:

* Wireless is getting bigger (it seems) - but how "secure" are your data and voice transmissions?

* Is online banking from your phone or computer really secure? How is security achieved?

* Is your email load increasing – especially with huge attachments? How can these large files be handled?
